SKILLS

Programming

- TypeScript • JavaScript • C/C++
- Python

Libraries/Frameworks

- Next.js • React.js • Node.js
- ExpressJs • jQuery • REST API
- TailwindCSS • zustand • FastAPI

Tools/Platforms

- Git • GitHub • ESBuild • MongoDB
- PostgreSQL • Webpack • Supabase

PERSONAL DOSSIER

Languages Known

- Hindi • English • Marathi

Hobbies

- Travel • Guitar • Music • Swimming

PROJECTS

- **MedsOverflow** - [Source Code](#)
- **Tech-Beat** - [Live Preview](#)
- **EngageSync** - [Live Preview](#)

EXPERIENCE

TBP CODOT | SOFTWARE DEVELOPER - I

August 2024 – Current | Bangalore, India (Remote)

- Delivered a multi-tenant PG management platform spanning 120+ screens, 4 user roles, and complex financial, compliance, and operational workflows.
- Built a full-featured Next.js 15 medical education mentorship platform **GooCampus** serving 10K+ users across multiple countries (India, UK, Australia, USA).
- Developed multi-platform video meeting system supporting Google Meet (with OAuth2 calendar integration)
- Developed end-to-end full-stack applications using React, Next.js, React Native, TypeScript, MongoDB, PostgreSQL.

OLA | SOFTWARE DEVELOPER - I

August 2024 – August 2025 | Bangalore, India (Remote)

Kruti.ai

- Collaborated on building the agentic flows for cab booking, food ordering, and bill payment functionalities.
- Collaborated on building the Discover feature (projected 50K DAU).
- Worked closely with senior developers in a team of 4, gaining hands-on experience in web architecture and feature development.

AEONS TECHNOLOGIES | FRONTEND DEVELOPER INTERN

August 2023 – December 2023 | Remote

- Developed dynamic web applications including portfolios, e-commerce platforms, and ERP systems using React.js, JavaScript, and CSS frameworks (Bootstrap, Tailwind CSS) with intuitive interfaces and seamless navigation.
- Optimized application performance through code splitting and image compression while ensuring consistent, responsive design across all platforms.

PROJECTS

MEDSOVERFLOW | FULLSTACK

[Source Code](#)

- A community-driven medical QA platform inspired by Stack Overflow.
- Developed a full-stack QA platform with complete CRUD operations for question posting, voting, searching, and tagging features using React.js, Node.js, Express.js, and MongoDB.
- Implemented RESTful API architecture for seamless frontend-backend integration, ensuring efficient data flow and scalable operations with robust database management and security.
- Built responsive UI components using React.js, JavaScript, and Tailwind CSS to deliver an intuitive user experience across devices.

TECH-BEAT | FRONTEND

[Source Code](#)

- Built a fully functional e-commerce UI for an online electronics store using React.js and Redux, implementing product browsing, search, filtering, and sorting features for enhanced user navigation.
- Integrated Redux for centralized state management across components, ensuring efficient data flow and consistent user experience throughout the shopping interface.
